

Flowmapr

Product Requirements Document — v2.0 · March 2026

1. Product Overview

Flowmapr is a web-based SaaS that generates professional diagrams from plain-text descriptions. Built for Business Analysts, Systems Analysts, and Product Managers who need clean, editable diagrams in seconds — without Visio, draw.io, or moving boxes manually.

Core value: Describe a process in plain language → get a clean, editable diagram instantly. No code required.

2. Target Users

Persona	Role	Key Pain
Anna	Systems / Business Analyst	Spends 2–3 hrs/week in draw.io building BPMN from scratch
Pavel	Product Manager	Uses Miro for flows but it's a whiteboard, not a proper flow tool
Maria	Tech Lead	No single source of truth for business diagrams across the team

3. Supported Diagram Types

- **BPMN 2.0** — Business process flows with tasks, gateways, events, pools, lanes
- **Flowchart** — General purpose process diagrams
- **UML Sequence** — System interaction and message flow diagrams
- **ERD** — Entity-relationship diagrams with PlantUML export
- **C4 Model (L1)** — System context diagrams — high-level architecture
- **C4 Model (L2)** — Container diagrams — services and data stores

4. MVP Scope

In Scope

- ✓ AI generation from text prompt (English only)
- ✓ Visual editor with React Flow (drag-and-drop)
- ✓ API Lens — generate C4 architecture from OpenAPI/Swagger spec (Basic+)
- ✓ Code Lens — generate flowchart + docs from code snippet (Pro only)
- ✓ Explain Diagram — AI explanation of any diagram (all plans)
- ✓ Save diagrams to personal workspace with projects/folders
- ✓ Share via public read-only link
- ✓ Embed via iframe (Pro)

- ✓ Export PNG and PDF
- ✓ Version History (Basic+)
- ✓ Auto-save (debounced 2s)
- ✓ Generation counter enforcement per plan
- ✓ Guided onboarding flow (all plans)
- ✓ Account & subscription management via Polar.sh
- ✓ Landing page with pricing
- ✓ Error monitoring via Sentry

Out of Scope (Post-MVP)

- ✗ Export to Confluence / Notion / GitHub
- ✗ Team workspace & real-time multiplayer editing
- ✗ Mobile app
- ✗ AI Edit mode (in-canvas AI editing)
- ✗ Diagram diff / history viewer
- ✗ Russian-language UI
- ✗ Priority support / SLA
- ✗ Annual billing
- ✗ API access for developers

5. Monetization

Feature	Free	Basic \$20/mo	Pro \$50/mo
AI generations	3 / month	100 / month	500 / month
All diagram types	✓	✓	✓
Export PNG / PDF	✓	✓	✓
Explain Diagram	✓	✓	✓
Public sharing	✓	✓	✓
API Lens	✗	✓	✓
Version History	✗	✓	✓
Code Lens	✗	✗	✓
Embed (iframe)	✗	✗	✓
Export Confluence/Notion	✗	✗	Post-MVP

Payments via Polar.sh · No annual billing for MVP · Resets monthly on billing date

6. Subscription Lifecycle

Sign up	Free plan, 3 generations/month, no credit card required
Upgrade	Immediate effect via Polar.sh checkout

Cancel	Access continues until period end, then reverts to Free (3 gen/month)
Revoke	Handled via subscription.revoked webhook → downgrade to Free
Reactivate	Via subscription.uncanceled webhook → status back to active
Delete account	Confirmation modal required, permanently deletes all data

7. Generation Loading UX

Generation can take up to 60 seconds. Always show a full loading screen with step-by-step progress — never a blank screen or generic spinner.

- 1. "Analysing prompt..."
- 2. "Building structure..."
- 3. "Rendering diagram..."

8. Auto-Save

Diagrams auto-save on every canvas change, debounced at 2 seconds after the last change. No manual Save button. A subtle "Saved" indicator appears in the top bar after each save.

9. Landing Page Sections

- **Hero** — Headline, subheadline, CTA "Try free — no credit card required", demo screenshot
- **Problem** — 3 pain points: draw.io is slow, Eraser is for devs, ChatGPT can't save diagrams
- **How it works** — 3 steps with UI screenshots
- **Demo** — Looping screen recording of a real generation
- **Pricing** — 3-column table, Basic highlighted as "Most popular"
- **FAQ** — 5–7 questions including API Lens and Code Lens
- **Footer** — Logo, Privacy Policy, Terms of Service, support@flowmapr.com

Hero headline: "Turn requirements into diagrams. Instantly."

Primary CTA: "Try free — no credit card required" → /signup

10. Key Product Decisions

UI language	English only (MVP)
Loading experience	Step-by-step progress screen, up to 60s
Save mechanism	Auto-save, debounced 2s, no manual button
Free plan limit	3 generations/month (resets monthly)
Basic plan limit	100 generations/month
Pro plan limit	500 generations/month
Re-prompt credit	Yes, consumes 1 generation credit
Version history	Available on Basic and Pro plans

Annual billing	Post-MVP
Resubscribe flow	Cancel → wait for period end → purchase new subscription
Error monitoring	Sentry for server errors (generate, webhooks, API Lens, Code Lens)
Dark mode	Post-MVP (semantic CSS tokens prepared)
